THE ROAD SAFETY MANUAL

WHAT IS RSM?

PIARC Road Safety Manual (RSM) was developed to help countries, road authorities and operators to fulfil their road safety objectives. The Manual is aligned with key pillars of the UN Decade of Action for Road Safety and it is freely available online:

roadsafety.piarc.org 

RSM provides a comprehensive resource for countries wanting to adopt the safe system approach.

STRUCTURE OF RSM

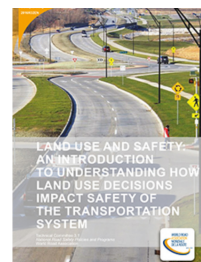

- 3 main parts, 12 chapters
- PDF download and print in chapters
- Online available for free

WHAT IS NEW?

The **third edition** of PIARC RSM is now available. It provides updates to each of the chapters by incorporating new information and details. Newly released PIARC publications are highlighted throughout by providing RSM user weblinks to each of them:

1. **Land use and safety: an introduction to understanding how land use decisions impact safety of the transportation system**
2. **Human factors guidelines for a safer man-road interface**
3. **Vulnerable road users: Diagnosis of design and operational safety problems and potential countermeasures**
4. **The Role of Road Engineering in Combatting Driver Distraction and Fatigue Road Safety Risks**

CASE STUDIES

Over **40 new case studies** are added to a web library and are linked throughout the RSM chapters by providing a summary and associated link to each of the case studies.

Placed in multiple chapters and different sections, the case studies are provided to show the reader implementations of safe systems practices worldwide.

Case studies come from Czech Republic, Denmark, France, Italy, Malaysia, Mexico, New Zealand, Paraguay, Portugal, Slovenia, Sweden and many more.
